

- Note:**
1. Simulated concentrations from fate and transport groundwater model compared to measured concentrations obtained in 2005/2006.
 2. Basemap from: "Remedial Investigation/ Feasibility Study Report Sauguet Area 2", URS Corporation, St. Louis, Missouri, January 30, 2004.
 3. The residual value plotted is the difference between simulated and measured values. Positive residuals indicate model overestimation while negative residuals indicate model underestimation.
